	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Takes players and their stats through the terminal ● Arranges a bracket based on stats ● Prints the finished bracket inside the terminal	**Schedule - (For V2.0+)** ● Integrate doubles and singles players functionality ● Information about players can be taken in through a CSV file instead of the terminal ● Add the brackets to a file and let the user download the file
Not Important	**Delegate - (Use a library)** ● Keep a history of games and create an internal score ● Add colors and format tables using a library ● Display the brackets using a visualization library	**Delete - (Cut it)** ● Make the bracket system into a fully functioning web application ● Add user and admin roles so people can create games and others can participate ● Add profile options to each player
